PeVino

THE ULTIMATE WINE COOLER

2021

PEVINO
THE ULTIMATE WINE COOLER

At Pevino we take **great pride** in being a manufacturer of **premium wine coolers** for even the most discerning wine enthusiast. As a **Danish brand** we are deeply rooted in the Scandinavian design tradition, and all our products are designed at our own facilities.

All wine coolers in the Pevino 2021 Collection are characterized by **minimalistic design aesthetics**, a consistent high level of build quality and a passionate focus on **every single detail.**

Welcome to the world of Pevino.

Pevino 2021

Reservations are made for printing errors and changed specifications as well as any difference in color shades between catalog and original product. The indicated bottle capacity is based on a maximum of standard Bordeaux bottles with a minimum of shelves mounted.

The Pevino 2021 Collection

Pevino MS

Inspired by professionals, the impressive Pevino MS stores your wine on 16 horizontally oriented metal shelves for easy access. Holds up to 161 bottles and comes with oak wood or black metal shelf trim.
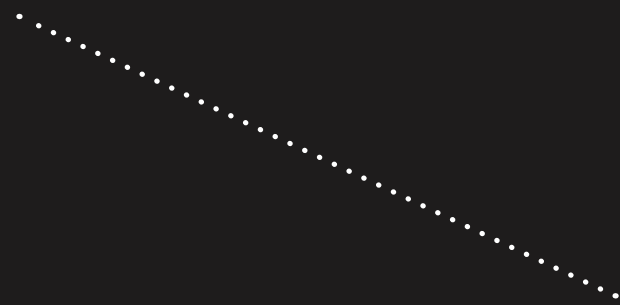

Pevino BI

This brand-new range of wine coolers redefines what a wine cooler should be. The ultra-slim design makes it the ultimate wine cooler for discreet built-in, and it won't take up too much space should you choose to install it as freestanding either.

Pevino NG

The backbone of the Pevino line-up, the New Generation range is as good as it gets. The wine coolers are suitable for both built-in and freestanding installation and comes in sizes ranging from 20-200 bottles.
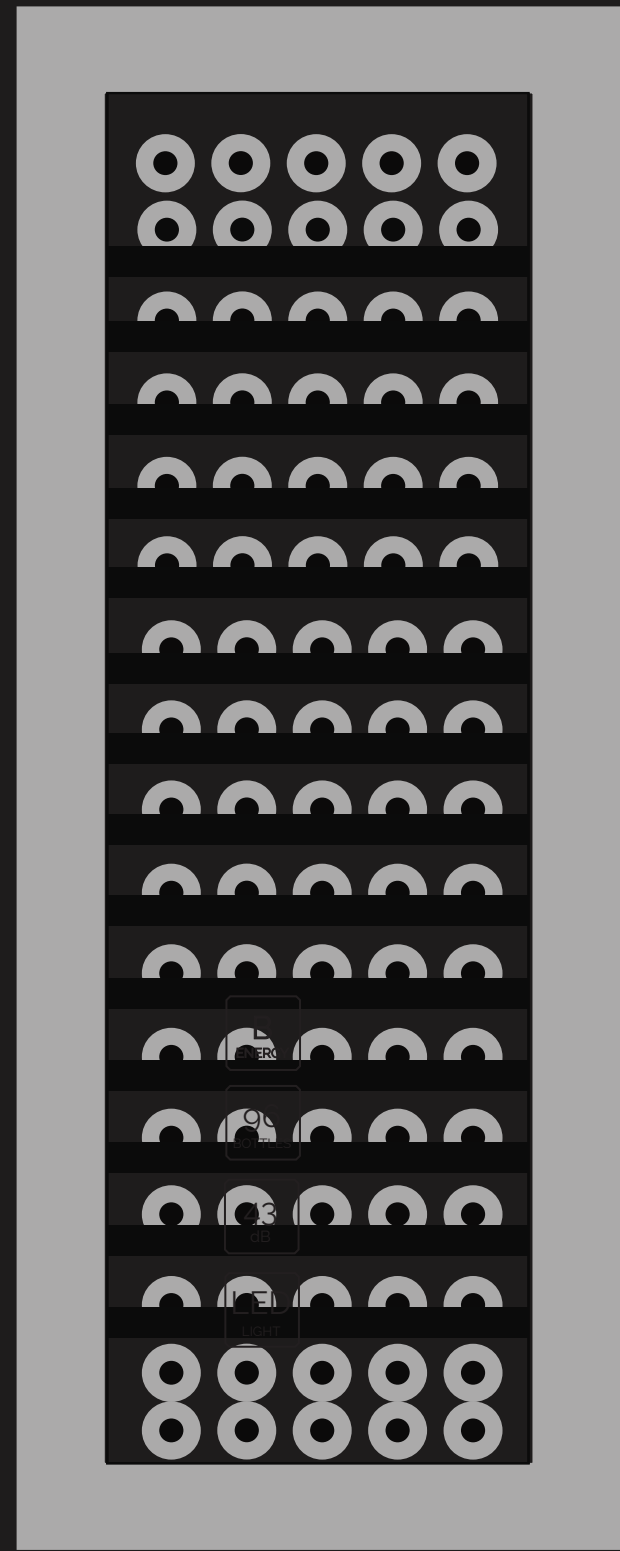

Pevino Integrated

A perfect match for the contemporary kitchen, the integrated Pevino wine coolers are as subtle as they are stylish. They are available as both single and dual zone, and you can choose between the classic door grip version or the brand-new push-open edition.
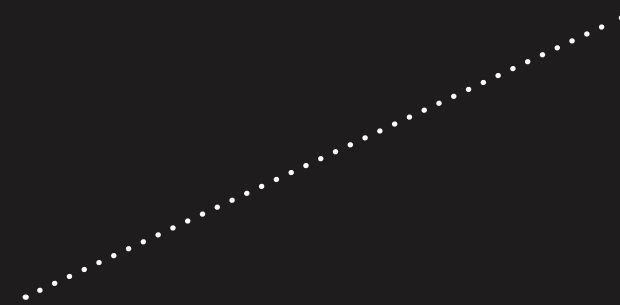

Pevino Giant

Too much of a good thing? No way. This massive wine cooler stores up to 300 of your precious bottles, and it comes in both single and dual zones versions. The perfect solution for both storage and maturing.

Pevino Cigar Humidor

Customized to serve the needs of even the most discerning cigar aficionado, the Pevino Cigar Humidor holds up to 1200 cigars while giving you full control over both temperature and humidity.

PEVINO MS

STORE YOUR WINE
LIKE A PROFESSIONAL

This elegant single zone wine cooler lets you store up to 161 bottles

on 16 fully retractable horizontal metal shelves. The horizontal layout of the shelves is

inspired by top-sommeliers from around the world who appreciate this

impressive and highly practical design that ensures easy access to every single bottle.

PEVINO MS 161 BTL. SINGLE ZONE

A BEAUTIFUL DISPLAY

Inside the Pevino MS your bottles are illuminated by a **beautiful orange light**, and the clever Winter Function,
along with the **built-in alarm** for sudden changes in humidity and temperature,
will make sure that your wine is kept safe at all times.
The horizontal shelves are available with **oak wood trim**.

PEVINO BI

THE WINE COOLER - REDEFINED

The brand new Pevino BI (Built-In) range redefines what it means to store your wine in a safe, practical and stylish manner. The innovative Pevino BI models are characterized by a much slimmer design than the average wine cooler, making them your best choice for both built-in and freestanding wine storage.

PEVINO BI 96 BTL. SINGLE ZONE

THE CHOICE IS YOURS

The Pevino BI range includes two sizes for 54 and 96 bottles, respectively. Both sizes are available in either single or dual zone and include an impressive attention to details such as an energy efficient LOW-E glass door, fully retractable oak wood and metal shelves and 5 different colors of interior light

HORIZONTAL PERSPECTIVE

G ENERGY	
54 BOTTLES	
42 dB	
LED LIGHT	

Your wine is stored horizontally on unique oak wood and metal shelves, ensuring easy and convenient access to the bottles. This is a shelf configuration often used by professionals such as restaurants.

Furthermore this horizontal perspective has allowed our designers to create a completely new type of wine cooler, that takes up a lot less space than the average wine cooler on the market.

PEVINO BI 54 BTL. DUAL ZONE

ALL THE COLORS OF THE RAINBOW

With their ultra-slim design, the Pevino BI wine coolers are truly discreet and practical, but that doesn't mean they are boring. Not by a long shot.

You can personalize your Pevino BI by choosing between five diifferent interior light colors, and the backlit display panel glows in a beautiful orange hue

How to place your wine cooler

So, you know you want a wine cooler.
But where to place it?
Let's take a look at three of the most common ways to install a wine cooler.

Freestanding

The most common way to place a wine cooler is freestanding on either the floor or a table-top. Make sure to place the cabinet so that there's about ten centimeters of space on each side, and five centimeters on the back. That way, you'll ensure that your wine cooler can dispose of any excess heat.

Built-in

A built-in wine cooler typically has the same width as an ordinary kitchen unit (60 cm). This means that you can pull out a unit and fit the wine cooler instead. If you want a built-in wine cooler, it's important that you choose one that has been prepared for this specifically. The cabinet typically has its air intake at the front of its base near the socket.

Integrated

An integrated wine cooler is the perfect match for the modern kitchen. The front of an integrated model is slightly wider than the rest of the wine cooler, ensuring a perfect fit into a standard sized kitchen cabinet. When choosing to integrate a wine cooler into an existing kitchen cabinet you need to make sure that the hot air generated by the wine cooler is able to escape through an opening in the kitchen cabinet. Additionally, you'll need an air intake in the bottom of the kitchen cabinet.

PEVINO NG

THE NEW GENERATION

The Pevino New Generation (NG) range is at the **heart of Pevino's 2021 Collection**, and it serves the need of just about every wine collection imaginable. Pevino NG wine coolers are all **suitable for built-in** and are filled to the brim with the **latest technology and features**, giving your wine the **best possible storage conditions**.

ATTENTION TO DETAIL

The fully retractable (80%) shelves are illuminated by a soft light (choose between orange, blue and white), and the backlit LED display gives you full control over the interior temperature of the wine cooler. The use of the best performing compressor and ventilators available makes the Pevino NG range one of the most reliable and silent in its class.

Guide to Wine Storage

Temperature

As a general rule of thumb all types of wine should be stored at around 12°C, when storing them for longer periods of time. However, when storing your bottles for only a shorter period of time, there are differences between the different types of wine (See page 72). At high temperatures, your wine matures faster and vice versa at low temperatures. The absolute outer extreme limits of storage temperature are below 10°C and above 35°C. This is where the wine will be seriously damaged if stored for a longer period of time.

Humidity level

A relatively high level of humidity is desirable for safe wine storage. Ideally the humidity level should be kept between 65-75%. If an environment is too dry, the corks may dry out. The only immediate disadvantage of excessive humidity åis the risk of damaging the labels, making the bottle difficult to resell. To avoid this, you could protect the label with a coat of hairspray covering the label or you could wrap the bottle in household plastic wrap.

UV protection

Exposure to too much light will risk damaging the wine, upsetting its aroma, balance and also its color. For that reason, all Pevino wine coolers with glass doors have built-in UV-protection and use only harmless LED light in the interior of the wine coolers.
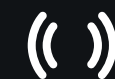

Vibrations

Wine bottles need a calm and stable environment in order to mature in the ideal manner – just like in a traditional wine cellar. A quality wine cooler should be fitted with an anti-vibration compressor to ensure minimum damage to the wine.

PEVINO GIANT

A WINE COOLER GIANT

Less is more, or so the saying goes. Sometimes, however, more is quite simply.. more. That is certainly the case with the Pevino Giant, the largest wine cooler in the Pevino collection. With room for up to 300 bottles, the Giant is truly awesome, and will serve the needs of even the most hardcore wine collector .

PEVINO
CIGAR HUMIDOR 1200
CIGARS

THE ULTIMATE HUMIDOR

This simply striking cigar humidor is a must-have for the most distinguished collectors of fine cigars.

Storing cigars:
Humidity and temperature are the most important factors when it comes to storing and aging cigars.
If cigars are stored too dry, they crack. Keep them too warm and humid, and they become moldy.

Most fresh cigars are significantly improved by storage for at least two or three months.

PeVino

THE ULTIMATE WINE COOLER

At Pevino we take great pride in being a manufacturer of premium wine coolers for even the most discerning wine enthusiast.

As a Danish brand we are deeply rooted in the Scandinavian design tradition and all our products are designed at our own facilities in the town of Hillerød just north of the capital, Copenhagen.

All wine coolers in the Pevino 2021 Collection are characterized by minimalistic design aesthetics, a consistent high level of build
quality and a passionate focus on every single detail.

Welcome to the world of Pevino.
